MEMORANDUM FOR: Deputy Director for Management and Services

SUBJECT : Weekly Report

25X1A  
25X1A

1. [REDACTED] All damage caused by the fire at the [REDACTED] transmitter site has been isolated and repairs are progressing quickly. A shorted interlock wire and burned circuit breaker are believed to have caused the fire. Although the damage was minimal, power could not be fully restored until all wiring and power panel equipment were checked for damage and repaired as necessary. Alternate routing plans which were placed into effect during the outage were quite successful. Only one time element message was delayed (see attached para 3 from Weekly Report dated 17 May) and no significant traffic backlogs occurred. The station is now near normal operation. "MINIMIZE" (which had been imposed because of [REDACTED] visits) has been lifted on all stations [REDACTED]

2. [REDACTED] became an on-line station a bit ahead of schedule last week when the [REDACTED] leased circuit to [REDACTED] went out for a four day period. Our communicator borrowed [REDACTED] KW-7s and established an on-line circuit [REDACTED] When [REDACTED] lease was restored their KW-7s were returned. Our own KW-7s have now been temporarily installed by our communicator and the circuit is being maintained [REDACTED].

3. [REDACTED] The latest correspondence on the subject of the [REDACTED] getting their own dedicated channel in the SKYLINK system is a telegram [REDACTED] asking if they are authorized to work with our CIA Communications Officer in making the [REDACTED] installation. They asked for an equipment loan from CIA [REDACTED] terminal gear which would be replaced in kind [REDACTED] to ourselves in Washington. [REDACTED] advised that they have sent a reply [REDACTED] indicating a number of problems preclude going this route now and that it will be reconsidered over the next six months.

CONFIDENTIAL

25X1A in New York, we located one case containing the chillers, still  
 25X1C on the lock in N.Y. One other case, containing vital panels,  
 25X1A was located [REDACTED]. To add to the troubles, the  
 25X1A truck carrying the shipment from the dock [REDACTED] was  
 involved in an accident. We are still trying to locate the  
 remaining seven crates. In the meantime, we are arranging  
 for urgent shipment of tools [REDACTED] (also missing)  
 and alerting [REDACTED] to assemble the material contained in the  
 missing seven crates for priority shipment, should they not be  
 located within the next few days.

Planned Activities

Training

25X1A A. [REDACTED]  
 25X1A The training workload [REDACTED] for the week  
 of 27 May is projected to be 10 courses of instruction with a  
 total of 35 students enrolled as follows:

25X1C

Office of Communications	27
[REDACTED]	2
DDO/AF	1
DDO/EA	2
